TRETTIOFÖRSTA BANDETS INNEHÅLL

Sid.

1. Beaudoin, A. R., Boström, H., Larsson, K. S. and Lohmander, S., The influence of *in vivo* trypan blue and prednisolone acetate treatment upon S^{35}-sulfate *in vitro* incorporation in cartilage 1– 4
2. Mårtensson, O. and Karlsson, G., π-electron spin densities of lignin constituents 5– 16
3. Elander, M., Trehalose-6-phosphatsynthetase aus Bäckerhefe 17– 30
4. Agenäs, L.-B., Selenium derivatives in the indole series. VI. Synthesis and mass spectrometric investigation of di-(3-indolyl)-methyl diselenide and related compounds 31– 44
5. Agenäs, L.-B., Mass spectrometry of organo-selenium compounds. VI. Mass spectra of 4-aminophenyl selenocyanate and alkyl substituted 4-aminophenyl selenocyanates 45– 55
6. Santesson, J., Chemical studies on lichens. 20. The xanthones of some crustaceous lichens 57– 64
7. Magnusson, B., Rodmar, B. and Rodmar, S., Activation parameters for the conformational isomerisation in duplodithioacetone 65– 71
8. Hermodsson, Y., Further refinement of the structure of the 1:2 addition compound between tin tetrachloride and seleninyldichloride, $SnCl_4 \cdot 2SeOCl_2$ 73– 81
9. Claeson, G. and Jonsson, H.-G., Synthesis and configuration of thiophane-2-valeric acid and some related compounds 83– 99
10. Håkansson, R. and Wiklund, E., Stereochemistry of 3,3′-bithienyls. I. Preparation of optically active 2,2′,4,4′-tetrabromo-5,5′-dicarboxy-3,3′-bithienyl and 2,2′,4,4′-tetrabromo-3,3′-bithienyl 101–110
11. Nilsson, E., Studies of flavylium compounds. 3. On the electronic spectra of some simple flavylium compounds and anthocyanidins 111–119
12. Santesson, J., Chemical studies on lichens. 21. Two novel chlorinated lichen xanthones 121–124
13. Öhman, J., A light-scattering study of cellulose tricarbanilate in good solvents 125–136
14. Öhman, J. and Shanbhag, V. P., A light scattering study of the solution behaviour of cellulose tricarbanilate in dibutyl ketone 137–141
15. Karlsson, H. and Odham, G., Studies on feather waxes of birds. VIII. The chemical composition of the wax in the free flowing secretion from the preen gland of the oystercatcher (*Haematopus ostralegus* L.) . . . 143–158
16. Agenäs, L.-B., Selenium derivatives in the indole series. VII. Synthesis and mass spectra of 5-selenocyanatoindole, 5,5′-diindolyl diselenide and analogous compounds 159–172
17. Teder, A., The spectra of aqueous polysulfide solutions. Part II: The effect of alkalinity and stoichiometric composition at equilibrium . . . 173–198
18. Hermodsson, Y., The structural chemistry of some solid solvates of the non-aqueous ionizing solvent seleninyldichloride 199–225
19. Lundström, T., Preparation and crystal chemistry of some refractory borides and phosphides 227–266

20. Aleby, S. and Fischmeister, Ingrid, The infrared spectra and polymorphism of long-chain esters. I. Methyl and ethyl esters of hexadecanoic to hexacosanoic acids 267–28
21. Aleby, S. and Fischmeister, Ingrid, The infrared spectra and polymorphism of long-chain esters. II. Methyl to octyl octadecanoates 283–29
22. Aleby, S. and Fischmeister, Ingrid, The infrared spectra and polymorphism of long-chain esters. III. Formates and acetates of octadecanol, eicosanol and docosanol 291–29
23. Bohman, O. and Allenmark, S., Resolution of the sulfoxide-derivatives of certain unsaturated malonic acids 299–30
24. Allenmark, S. and Bohman, O., A study of the decarboxylation of some sulfur-substituted unsaturated malonic acids 305–31
25. Sillén, L. G. and Warnqvist, B., High-speed computers as a supplement to graphical methods. 6. A strategy for two-level LETAGROP adjustment of common and "group" parameters. Some features that avoid divergence 315–33
26. Sillén, L. G. and Warnqvist, B., High-speed computers as a supplement to graphical methods. 7. Model selection and rejection with LETAGROP. Elimination of species with negative or "insignificant" equilibrium constants 341–35
27. Arnek, R., Sillén, L. G. and Wahlberg, O., High-speed computers as a supplement to graphical methods. 8. Some devices to speed up computations on chemical equilibria and simplify programming for LETAGROP. Application to complex formation 353–36
28. Brauner, Ph., Sillén, L. G. and Whiteker, R., High-speed computers as a supplement to graphical methods. 9. Adjustment for systematic experimental errors and other "group parameters" in LETAGROP. Applications to potentiometric titrations 365–37
29. Sillén, L. G. and Warnqvist, B., High-speed computers as a supplement to graphical methods. 10. Application of LETAGROP to spectrophotometric data, for testing models and adjusting equilibrium constants . . 377–39
30. Baldwin, W. G. and Sillén, L. G., Some phosphate equilibria. I. The dissociation of phosphoric acid in 3 M $NaClO_4$ 391–39
31. Torssell, K., The mechanism of oxidative decarboxylation by lead tetraacetate 401–40
32. Baldwin, W. G., Some phosphate equilibria. II. Studies on the silver-phosphate electrode 407–41
33. Gustafsson, H., Synthesis and resolution of α[indazolyl-2]-propionic acid 415–41
34. Baldwin, W. G. and Wiese, G., Equilibrium studies of polyanions. 18. Polymolybdate in 1 M $Mg(ClO_4)_2$ solutions 419–42
35. Baldwin, W. G. and Wiese, G., On periodate equilibria in acid 1 M $Mg(ClO_4)_2$ 429–43
36. Olsson, S. and Russell, M., Acid-induced aromatic hydrogen exchange. VII. Determination of exchange rates of deuterium and tritium against protium in benzene. Kinetic isotope effect on isotopic exchange. Variation of the kinetic isotope effect with the acid concentration 439–45
37. Russell, M. and Olsson, S., Acid-induced aromatic hydrogen exchange. VIII. Determination of the exchange rates of deuterium and tritium against protium in anisole. Kinetic isotope effect on isotopic exchange. Variation of the kinetic isotope effect with the acid concentration . . 455–46

8. Friberg, U., Lohmander, S. and Carlsson, G., Determination of ascorbic acid in microgram quantities in feedstuffs 467–474
9. Nilsson, E., Moss pigments. 9. Scutellarein glucoside in *Bryum weigelii* . . 475–480
0. Nolde, C., Madsen, J. Ø., Lawesson, S.-O. and Bowie, J. H., Electron impact studies. XLIII. Negative-ion mass spectra of organo-sulphur compounds. Sulphones, sulphoxides, sulphonamides, sulphonylchlorides, sulphonates, sulphides, and thiophenes 481–488
1. Hedblom, M.-O., Preparation and absolute configuration of the optically active 2,3-dimercaptosuccinic acids, their S,S′-dimethyl derivatives and the corresponding 1,3-dithiolanes and 1,4-dithianes 489–504
2. Werner, P.-E., An integrated set of programs for calculation of structure factors from an automatic film scanner process 505–511
3. Werner, P.-E., A Fortran program for least-squares refinement of crystal-structure cell dimensions 513–516
4. Weichert, R. †, Zur Racemattrennung von Aminosäuren durch Papieradsorptionschromatographie 517–532
5. Odham, G., Stenhagen, E. and Waern, K., Stereospecific total synthesis of mycocerosic acids 533–554
6. Berggren, B., Studies on yeast β-fructofuranosidase (invertase). XXIV. Comparison of K_m-values of enzyme fractions separated through gel filtration and by isoelectric focusing 555–563
7. Jansson, P.-Å., Melkersson, S., Ryhage, R. and Wikström, S., Mass spectral data processing. 2. Computer used for processing of mass spectra recorded on magnetic tape 565–578
